

determining whether to include in said one or more publications said manuscript based on said one or more reviews;

determining said one or more versions of said manuscript to publish in said one or more publications based on said one or more reviews; and

publishing said one or more publications.

Claim 22 (New): The method of claim 21, said determining said one or more versions of said manuscript to publish, further comprising:

translating said one or more versions of said manuscript to a typesetting format for inclusion in said one or more publications, wherein said one or more publications includes at least one manuscript or said one or more versions of said manuscript, relevant information for said manuscript, or said one or more reviews;

receiving order decisions from said one or more staff persons, wherein said order decisions provide at least an arrangement for said one or more versions of said manuscript in said one or more publications; and

determining contents of said one or more publications based on said order decisions.

Claim 23 (New): The method of claim 21, wherein receiving said manuscript includes at least one of (i) receiving a file uploaded to said computer system or (ii) receiving data pertaining to said manuscript provided to said computer system from a browser interface.

Claim 24 (New): The method of claim 21, wherein said manuscript includes data in the form of text, images, graphics, or multimedia.

Claim 25 (New): The method of claim 21, wherein said correspondence includes at least one of information about said author, subject matter of said manuscript, date and time of said submission of said manuscript, proposed publication dates, or proposed publications.

Claim 26 (New): The method of claim 21, wherein said list of reviewers is provided to said computer system by one or more of said plurality of clients.

Claim 27 (New): The method of claim 21, wherein said computer system produces said list of reviewers.

Claim 28 (New): The method of claim 21, wherein one or more of said plurality of clients produces said list of reviewers.

Claim 29 (New): The method of claim 21, wherein said list of reviewers is based on qualifying criteria, wherein said qualifying criteria includes at least one of (i) a reviewer's area of specialty, (ii) a reviewer's prior review history, (iii) a reviewer's professional associations, or (iv) a reviewer's availability.

Claim 30 (New): The method of claim 21, wherein said computer system requires authentication of identity from one or more of said plurality of clients.

Claim 31 (New): The method of claim 21, wherein said access provided by said computer system is secure.

Claim 32 (New): The method of claim 21, said receiving one or more reviews further comprising:

receiving a revision to said manuscript, wherein the author of said manuscript provided said revision based on said one or more reviews; and
providing said revision to said at least one reviewer for additional review.

Claim 33 (New): The method of claim 21, wherein said plurality of clients access said computer system via at least one of the Internet, an internet, or an intranet.

Claim 34 (New): The method of claim 21, said determining whether to include in said one or more publications, further comprising:

reporting said one or more reviews about said manuscript; and
receiving a selection decision to include said manuscript in said one or more publications.

Claim 35 (New): The method of claim 34, wherein said reporting includes acceptability information compiled from said one or more reviews.

Claim 36 (New): The method of claim 34, wherein said editor provides said selection decision.

Claim 37 (New): A computer program product comprising a computer usable medium including control logic stored therein, said control logic enabling publishing, comprising:

first receiving means for enabling the control logic to receive a manuscript at a computer system, wherein said computer system includes at least one database to store a plurality of submissions, and wherein said plurality of submissions includes at least one of a manuscript, correspondence, a review, descriptive information, or approval for publication of said manuscript;

translating means for enabling the control logic to translate said manuscript into a common format of said computer system;

storing means for enabling the control logic to store said manuscript in said computer system, wherein said manuscript is accessible to a plurality of clients, wherein said plurality of clients includes an author of said submissions, a reviewer, an editor, or a staff person managing one or more publications;

second receiving means for enabling the control logic to receive a selection of at least one reviewer for said manuscript from a list of reviewers, wherein said list of reviewers is maintained by said computer system;

first providing means for enabling the control logic to provide access to said manuscript to said at least one reviewer;

third receiving means for enabling the control logic to receive one or more reviews including at least one of a revised manuscript, correspondence, comments, recommendations, a score, relevant information, or a decision, wherein said decision is about at least one of accepting, rejecting, or requesting revisions to said manuscript;

second providing means for enabling the control logic to provide said one or more reviews related to said manuscript to at least one of said plurality of clients to collaboratively review said manuscript;

first determining means for enabling the control logic to determine whether to include in said one or more publications said manuscript based on said one or more reviews;

second determining means for enabling the control logic to determine said one or more versions of said manuscript to publish in said one or more publications based on said one or more reviews; and

publishing means for enabling the control logic to publish said one or more publications.

Claim 38 (New): The computer program product of claim 37, said determining said one or more versions of said manuscript to publish, further comprising:

translating means for enabling the control logic to translate said one or more versions of said manuscript to a typesetting format for inclusion in said one or more publications, wherein said one or more publications includes at least one manuscript or said one or more versions of said manuscript, relevant information for said manuscript, or said one or more reviews;

receiving means for enabling the control logic to receive order decisions from said one or more staff persons, wherein said order decisions provide at least an arrangement for said one or more versions of said manuscript in said one or more publications; and

determining means for enabling the control logic to determine contents of said one or more publications based on said order decisions.

Claim 39 (New): The computer program product of claim 37, wherein receiving said manuscript includes at least one of (i) receiving a file uploaded to said computer system or (ii) receiving data pertaining to said manuscript provided to said computer system from a browser interface.

Claim 40 (New): The computer program product of claim 37, wherein said manuscript includes data in the form of text, images, graphics, or multimedia.

Claim 41 (New): The computer program product of claim 37, wherein said correspondence includes at least one of information about said author, subject matter of said manuscript, date and time of submission of said manuscript, proposed publication dates, or proposed publications.

Claim 42 (New): The computer program product of claim 37, wherein said list of reviewers is provided to said computer system by one or more of said plurality of clients.

Claim 43 (New): The computer program product of claim 37, wherein said computer system produces said list of reviewers.

Claim 44 (New): The computer program product of claim 37, wherein one or more of said plurality of clients produces said list of reviewers.

Claim 45 (New): The computer program product of claim 37, wherein said list of reviewers is based on qualifying criteria, wherein said qualifying criteria includes at least one of (i) a

reviewer's area of specialty, (ii) a reviewer's prior review history, (iii) a reviewer's professional associations, or (iv) a reviewer's availability.

Claim 46 (New): The computer program product of claim 37, wherein said computer system requires authentication of identity from one or more of said plurality of clients.

Claim 47 (New): The computer program product of claim 37, wherein said access provided by said computer system is secure.

Claim 48 (New): The computer program product of claim 37, said receiving one or more reviews further comprising:

receiving means for enabling the control logic to receive a revision to said manuscript, wherein the author of said manuscript provided said revision based on said one or more reviews; and

providing means for enabling the control logic to provide said revision to said at least one reviewer for additional review.

Claim 49 (New): The computer program product of claim 37, wherein said plurality of clients accesses said computer system via at least one of the Internet, an internet, or an intranet.

Claim 50 (New): The computer program product of claim 37, said determining whether to include in said one or more publications, further comprising:

reporting means for enabling the control logic to report said one or more reviews about said manuscript; and

receiving means for enabling the control logic to receive a selection decision to include said manuscript in said one or more publications.

Claim 51 (New): The computer program product of claim 50, wherein said reporting includes acceptability information compiled from said one or more reviews.

Claim 52 (New): The computer program product of claim 50, wherein said editor provides said selection decision.

Claim 53 (New): A publishing system, comprising:

first means for receiving a manuscript at a computer system, wherein said computer system includes at least one database to store a plurality of submissions, and wherein said plurality of submissions includes at least one of a manuscript, correspondence, a review, descriptive information, or approval for publication of said manuscript;

means for translating said manuscript into a common format of said computer system;

means for storing said manuscript in said computer system, wherein said manuscript is accessible to a plurality of clients, wherein said plurality of clients includes an author of said submissions, a reviewer, an editor, or a staff person managing one or more publications;

second means for receiving a selection of at least one reviewer for said manuscript from a list of reviewers, wherein said list of reviewers is maintained by said computer system;

first means for providing access to said manuscript to said at least one reviewer;

third means for receiving one or more reviews including at least one of a revised manuscript, correspondence, comments, recommendations, a score, relevant information, or a decision, wherein said decision is about at least one of accepting, rejecting, or requesting revisions to said manuscript;

second means for providing said one or more reviews related to said manuscript to at least one of said plurality of clients to collaboratively review said manuscript;

first means for determining whether to include in said one or more publications said manuscript based on said one or more reviews;

second means for determining said one or more versions of said manuscript to publish in said one or more publications based on said one or more reviews; and

means for publishing said one or more publications.

Claim 54 (New): The system of claim 53, said determining said one or more versions of said manuscript to publish, further comprising:

means for translating said one or more versions of said manuscript to a typesetting format for inclusion in said one or more publications, wherein said one or more publications includes at least one manuscript or said one or more versions of said manuscript, relevant information for said manuscript, or said one or more reviews;

means for receiving order decisions from said one or more staff persons, wherein said order decisions provide at least an arrangement for said one or more versions of said manuscript in said one or more publications; and

means for determining contents of said one or more publications based on said order decisions.

Claim 55 (New): The system of claim 53, wherein receiving said manuscript includes at least one of (i) receiving a file uploaded to said computer system or (ii) receiving data pertaining to said manuscript provided to said computer system from a browser interface.

Claim 56 (New): The system of claim 53, wherein said manuscript includes data in the form of text, images, graphics, or multimedia.

Claim 57 (New): The system of claim 53, wherein said correspondence includes at least one of information about said author, subject matter of said manuscript, date and time of submission of said manuscript, proposed publication dates, or proposed publications.

Claim 58 (New): The system of claim 53, wherein said list of reviewers is provided to said computer system by one or more of said plurality of clients.

Claim 59 (New): The system of claim 53, wherein said computer system produces said list of reviewers.

Claim 60 (New): The system of claim 53, wherein one or more of said plurality of clients produces said list of reviewers.

Claim 61 (New): The system of claim 53, wherein said list of reviewers is based on qualifying criteria, wherein said qualifying criteria includes at least one of (i) a reviewer's area of specialty,

(ii) a reviewer's prior review history, (iii) a reviewer's professional associations, or (iv) a reviewer's availability.

Claim 62 (New): The system of claim 53, wherein said computer system requires authentication of identity from one or more of said plurality of clients.

Claim 63 (New): The system of claim 53, wherein said access provided by said computer system is secure.

Claim 64 (New): The system of claim 53, said receiving one or more reviews further comprising:

means for receiving a revision to said manuscript, wherein the author of said manuscript provided said revision based on said one or more reviews; and

means for providing said revision to said at least one reviewer for additional review.

Claim 65 (New): The system of claim 53, wherein said plurality of clients accesses said computer system via at least one of the Internet, an internet, or an intranet.

Claim 66 (New): The system of claim 53, said determining whether to include in said one or more publications, further comprising:

means for reporting said one or more reviews about said manuscript; and

means for receiving a selection decision to include said manuscript in said one or more publications.

Claim 67 (New): The system of claim 66, wherein said reporting includes acceptability information compiled from said one or more reviews.

Claim 68 (New): The system of claim 66, wherein said editor provides said selection decision.
